

DROUGHT MASTER WF LAWN SEED BLEND

WITH FERTILISER
AND GRANULAR
WETTING AGENT

Ideal for home lawns, or landscaped areas where drought tolerance is required.

Combines drought tolerant cool season grasses as well as summer hardy couchgrass. The addition of Wett-Up granular wetting agent will greatly improve water penetration during establishment and assist water penetration into difficult to wet soils. Starter Fertiliser will provide the required nutrients to enhance strong seedling vigour.

Seed Mixture By Count:

- 40% Perennial Ryegrass
- 40% Annual Ryegrass
- 20% Bermuda Couch (unhulled)
- 10% (by weight) Starter Fertiliser
- 20% (by weight) Granular Wetting Agent

Application:

- New Sowing: 40-50g/m²
- Oversowing: use approx half new sowing rate

Sizes available:

Available in 5kg & 25kg
