5000 Slimline	

Let's get you saving water!

STEP 1 - Your water needs

Establish your required water usage for the garden, pool, spa etc. Determine the rainfall in your area, your catchment (roof) size and available space to place your tank. It is better to over estimate your water needs than to run out!

STEP 3 - Site preparation

If you're having your tank delivered, check you have sufficient clearance for the delivery vehicle which can be up to 19m in length, 3m wide and 4.5m tall. Tanks require a level, stable base capable of supporting the weight of the tank when full.

STEP 2 - Choose your tank

Melro recommends you choose the largest tank to suit your site. If space is limited, multiple tanks can be joined together to achieve greater storage capacity. All tanks are available in a range of standard colours. Special colours available upon request.

STEP 4 - Installation

Melro recommends use of a suitably qualified tradesperson to carry out installation work, according to the regulations applicable in your local area. Customers must ensure all plugs and tank connections are sealed correctly. Detailed installation instructions are available upon request. Your reseller should be able to arrange installation and assist with a range of tank accessories including pumps, first flush diverters and water level indicators.

Delivery Areas

Tank Delivery

Please check with your dealer's irrigation expert for delivery. Additional charges may apply for deliveries outside the shaded area.

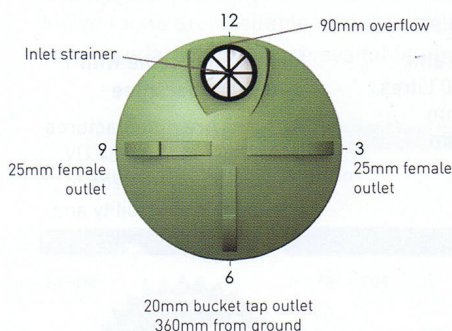

Driver Assistance

Our drivers can place tanks next to the truck only. Round tanks 10100 litres and above and slimline tanks 4000 litres and above are extremely large; customers should arrange two able bodied people on site to assist the driver with unloading. If tanks need to be repositioned customers must arrange further assistance as required, otherwise tanks will be placed at the closest location at the driver's discretion.

Tank Fitout Details

Round Tanks

Small Round Tank

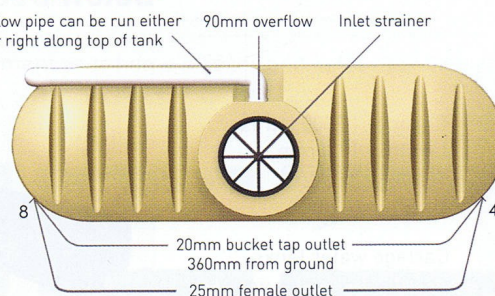

1000 litres have same fitout as left except overflow is at 3 o'clock
