

Getting Rid of Army Worms & Lawn Grubs Pest Control from Lawn Lovers

Army worm or sod web worm can be really bad news and can attack all sorts of lawns right across Australia. Sadly their favourite lawn is a healthy one.

If you notice a patch of lawn that is slightly shorter or thinner or that looks like it might have been recently mown (but you know it hasn't) you could have army worm.

Worms can be green, brownish green or black in appearance and sometimes have a striped appearance.

Once treated with Grub Guard or Pest Control you'll need to give your lawn a good fertilise to bring it back to its former glory.

You need to use a broad spectrum insecticide such as **Sir Walter Pest Control** or **Lawn Lovers Grub Guard**. Grub Guard is one of the only products currently on the market that can be used as a preventative treatment against lawn grubs.
